This document summarizes procedures and regulations governing graduate work in the Department of Psychology at Virginia Polytechnic Institute and State University. The material herein is a supplement to description of University-level requirements described in the Graduate Catalog (http://graduateschool.vt.edu/graduate_catalog). Students should be familiar with the information in this handbook and the Graduate Catalog, and can address questions to the Department Chair or Director of Graduate Programs in Psychology.

Virginia Tech does not discriminate against employees, students, or applicants on the basis of race, color, sex, sexual orientation, disability, age, veteran status, national origin, religion, or political affiliation. The university is subject to titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, the Age Discrimination in Employment Act, the Viet Nam Era Veteran Readjustment Assistance Act of 1974, Federal Executive Order 11246, Governor Allen’s State Executive Order Number Two, and all other rules and regulations that are applicable. Anyone having questions concerning any of these regulations should contact the Equal Opportunity/Affirmative Action Office.
TABLE OF CONTENTS

I. Welcome to the Department of Psychology at Virginia Tech

II. Directory of Faculty and Current Graduate Students

III. Applications and Admissions

IV. Graduate Student Orientation

V. Standards for the MS and PhD Student Advisory Committee (SAC)

VI. Curriculum
   A. Core, Depth and Breadth Curriculum and Plans of Study
   B. Additional Courses (by Area/Program)
   C. Waiving Thesis and Core Course Requirements, Transferring Other Courses
   D. Exceptions to Department-Level Requirements

I. Welcome to the Department of Psychology  
http://www.psyc.vt.edu

II. Directory of Faculty, Staff, and Graduate Students  
http://www.psyc.vt.edu/people

III. Applications and Admissions

Department Procedures  http://www.psyc.vt.edu/graduate/#admission
University Procedures  http://www.grads.vt.edu/admissions/applying/index.html

The Department of Psychology subscribes to the “Resolution Regarding Scholars, Fellows, Trainees, and Graduate Students” as adopted by the Council of Graduate Schools in the United States; and to the statement adopted by the Council of Graduate Departments of Psychology which indicates that “An acceptance given or left in force after April 15 commits the student not to solicit or accept another offer. Offers made after April 15 must include the proviso that the offer is void if acceptance of a previous offer from a department accepting this resolution is in force on that date.”

IV. Graduate Student Orientation

All new graduate students attend an orientation meeting with the Department Chair and the Director of Graduate Programs during the week before classes begin in the Fall semester (announced by email). Each PhD Area Director conducts additional orientation meetings with graduate students to discuss program-specific requirements.

V. Standards for the MS and PhD Student Advisory Committee (SAC)

A. Master of Science

1. The major professor (Chair of Student Advisory Committee) must hold the terminal degree and hold the rank of Assistant Professor or above in the Department of Psychology.

2. The Student Advisory Committee (SAC) must have at least two members from the Psychology faculty, one of whom has chaired a Psychology thesis to completion. An experienced committee member will provide guidance to the major professor who is chairing his or her first master’s SAC.

B. Doctor of Philosophy

1. The major professor (Chair of SAC) must be a full-time member of the faculty of the Department of Psychology.

2. The SAC must have a minimum of four members who hold academic rank at Virginia Tech, at least three of whom are Psychology Department faculty. Note that individuals whose only appointment to the University is “Adjunct” are not considered to have academic rank.

3. The SAC must have a chair who has directed a Psychology thesis to completion and one member who has directed a Psychology dissertation to completion, or two members who have directed Psychology dissertations to completion if the chair has not directed a Psychology thesis to completion. An experienced committee member will provide guidance to the major professor who is chairing his or her first doctoral SAC.

4. At least one member of the SAC must be from faculty outside of the student’s Department Area (i.e. Clinical, Industrial/Organizational, or Developmental and Biological). This member may be either from a different Area within the Department or from another department or program at Virginia Tech.
5. Students are encouraged to consider having more than the minimum number of members on the SAC. Decisions regarding the final composition of the SAC should be made by the student in conjunction with the major professor.

6. The SAC may have additional members without academic rank at Virginia Tech.

C. Expectations for Faculty Participation on SAC

It is the department’s expectation that all faculty serving on SACs will participate actively in the academic development of students and in the direction of their research programs. There is no maximum number of committees on which faculty may serve, but faculty members should ensure that they do not accept memberships on advisory committees for which they are unable to fulfill the requirements. Performance of faculty in this important capacity will be part of regular faculty evaluations conducted by the Department Chair. The Director of Graduate Programs will share responsibility with the Department Chair for all aspects of SACs.

VI. Curriculum  

A. Core, Depth, and Breadth Curriculum

All students must meet the minimum requirements for the MS/PhD degree as described in the graduate catalog, available at the VT Graduate School website. These also are summarized in the “Instructions” page of the Plan of Study described below, and located on the graduate program forms website that is linked to the department’s website.

It is the student’s responsibility to meet both the department and university requirements for fulfilling the curriculum for the MS and PhD degrees. Careful planning is essential. To guide course planning, all students complete a Plan of Study for the MS, and a second Plan of Study for the PhD. Consult the Graduate Catalog for general University-level requirements. Psychology Department requirements are described below. All graduate courses are not offered each semester or year. It is important that entering graduate students consult with their advisors in order to plan a program of study which will satisfy these guidelines.

Plan of Study (POS) instructions, FAQ, examples, and templates can be found in a link at http://www.psyc.vt.edu/graduate/

Courses offered at the graduate level in the Department of Psychology:

PSYC 4014: History and Systems in Psychology
PSYC 5114: Industrial Psychology
PSYC 5124: Organizational Psychology
PSYC 5134: Advanced Psychometric Theory
PSYC 5344: Cognitive Psychology
PSYC 5404: Biological Bases of Behavior
PSYC 5534: Developmental Psychology
PSYC 5314: Psyc Perspectives in Social Psychology
PSYC 5274: Personality Processes
PSYC 5284: Psychopathology
PSYC 5294: Psychophysiology
PSYC 5374: Health Psychology
PSYC 5544: Cognitive Development
PSYC 5554: Social Development
PSYC 6014: Quantitative Topics in Applied Psychology
PSYC 6254: Advanced. Topics in Clinical Psychology: Neuropsychology
PSYC 6934: Advanced Topics in Applied Psychology
PSYC 6944: Advanced Topics in Developmental Psychology
PSYC 6954: Advanced Topics in Biological Psychology
PSYC 6254: Advanced Topics in Clinical Psychology

Minimum grade requirement: Failure to attain at least a B- in a core course will require remediation. Students who receive grades lower than a C- must retake the course, consistent with the Graduate School Policy. A student receiving a C+, C, or C- in a core, depth or breadth course must remediate deficiencies in her or his performance to the satisfaction of the instructor. Remediation may involve attending some or all of the classes the next time the course is offered, re-taking tests, re-doing papers or other class assignments, or completing alternate assignments to demonstrate competence in the areas that were deficient. Tasks to be performed and criteria to be met are left to the discretion of the instructor but generally should approximate evidence of a level of competence consistent with the grade of B- or higher. It is the student’s responsibility to initiate this process by contacting the instructor and creating a written contract for the work to be completed. The contract should be signed by both the student and the instructor and a copy should be forwarded to the Director of Graduate Programs. Normally remediation should occur in the semester following the one in which the deficient grade was received unless, at the instructor’s request, the student must wait until the course is offered again. When the deficiency is remediated, the instructor will send a letter to the Director of Graduate Programs documenting that the remediation has occurred and the letter grade that the student’s remediated performance has earned. The Director of Graduate Programs will inform the student and place a copy of the letter in the student’s file.

All psychology graduate students must complete the Core, Breadth, and Depth curricula, as well as additional coursework.

Because entry-level graduate students come from diverse academic backgrounds, our graduate program provides a common foundation while also allowing individualized coursework. The department core curriculum provides training in research methods and statistics, the depth curriculum ensures rigorous training within a student’s specified area of expertise, and the department breadth curriculum facilitates broader training in the more specialized areas of the doctoral graduate programs.

Core curriculum: At least three quantitative and research methods courses

- The two semester, two course sequence in research methods (PsyC 5315-5316)
- One or more additional courses in statistics, psychometrics, or advanced methodology. Students should consult their advisory committee in selecting these courses. Examples include:
  - PSYC 5134: Advanced Psychometric Theory
  - PSYC 6014: Quantitative Topics in Applied Psychology
  - EDRE 6634: Advanced Statistics for Education
  - EDRE 6654: Multivariate Statistics Applications to Educational Problems
  - EDRE 6664: Application of Structural Equations in Education
  - EDRE 6794: Advanced Topics in Educational Research
  - HD 6514: Advanced Research Methods

Depth curriculum: At least three graduate-level courses within the student’s research concentration area that deepen her or his understanding of the theories, methodologies, and existing literatures pertaining to her or his defined area of interest. Students should consult their advisory committee and program-specific information described below in selecting their “depth” courses.
**Breadth curriculum:** At least three graduate-level courses outside of the student's research concentration (including but not limited to the Department of Psychology), designed to educate students in domains of study that complement their research interests, and expand students' general knowledge of the field at large. Students should consult their advisory committee and program-specific information described below in selecting their “breadth” courses.

**B. Additional coursework:** Each of the department’s three programs specifies additional course requirements that are specific to the program, described below.

**i. Clinical Psychology:**
http://www.psyc.vt.edu/graduate/clinical/curriculum

**Core Requirement** (quantitative research methods): See “General Curriculum” section above.

**Depth Requirement, Clinical “Area of Emphasis”:** All students complete three courses in a student’s area of emphasis. The courses can be within or outside the department and are tailored by the student and advisor to meet a student's interests and career goals.

**Breadth Requirement:** The Department curriculum requires graduate-level courses outside of the student's Depth/Clinical Area of Emphasis, and allows for additional required courses that are designed to educate students in domains of study that complement their research interests and expand students' general knowledge of the field at large. For clinical science PhD students, this requirement is met by completing four courses – at least one course within each of these four domains: Biobases, Cognitive-Affective, Social, and Developmental. This breadth curriculum is consistent with guidelines from the American Psychological Association for breadth of scientific knowledge and development. Often this requirement can be met by completing a basic 5000-level course in one of these areas, such as the “Biobases” and “Developmental” courses. However, other courses at the 5000- and 6000-level can be completed to meet a requirement in a domain. For example, a course in cognitive development can meet a requirement for a course in the developmental domain. However, one course can only meet a requirement for one domain. Specific courses should be decided by the student and her/his advisor. Preferably, the specific course should be consistent with the student's overall interests and career plans. In addition, currently the history and systems of psychology and the study of diversity are infused throughout the program's and department's courses.

*Biobases* (one of these)
PSYC 5294 - Psychophysiology
PSYC 5404 - Biological Bases of Behavior
PSYC 6254 - Clinical Neuropsych

*Cognitive-Affective*
PSYC 5274 Personality

*Social*
Psych 5314 Psych Perspectives in Social Psychology

*Developmental* (one of these)
PSYC 5534 - Developmental Psychology
PSYC 5544 - Cognitive Development
PSYC 5554 - Social Development
PSYC 6944 - Advanced Topics in Developmental Psychology

**Additional Coursework Requirements:**

**Core Clinical Courses:** All four of the following are required
PSYC 5284 Psychopathology
The training goal of the Developmental and Biological Psychology (DBP) graduate program is to ensure that students who achieve the doctoral degree are well-prepared for careers in psychological research. To this end, the curriculum is structured to educate students in quantitative methods/designs and philosophy of science (quantitative requirement), to educate students in domains of study that are specifically related to their areas of research interest (depth requirement), to educate students in domains of study that complement their research interests, and expand students’ general knowledge of the field at large (breadth requirement). Please note that courses can only be designated as “breadth” or “depth” as they relate to a given individual student’s research interest (in other words, a single course can act as either for two different students). “Depth” is conceptually defined as a course that is specifically related to the student’s primary area of research focus, whereas “breadth” is conceptually defined as a course that introduces the student to literatures, methodologies/analytic strategies, and/or theoretical frameworks that are substantively different from those representing their area of primary research focus.

In order to meet this training goal, each student is expected to formulate a plan of study with consultation from their faculty advisor and their advisory committee that satisfies the core (quantitative), depth, and breadth requirements. A few specific courses are required for all students, while still allowing DBP students to exercise considerable freedom in composing plans of study that satisfy their intellectual and research needs. In addition to regular coursework, the DBP area also meets on a regular basis (“Datapalooza”) throughout the Fall and Spring semesters to talk about current research projects, data analysis problems, design plans for new studies, etc. This is an informal meeting to get us all acquainted with each other’s research interests, provide students with an opportunity to present research to a group, and also as an occasional platform to discuss professional development issues (e.g., research ethics, authorship protocols, etc.).

Core Requirement (quantitative research methods): See “General Curriculum” section above.

Depth Requirement: Two graduate-level courses within the student’s research concentration (5000-level; including but not limited to the Department of Psychology). A third depth course is taken as a Special Topics course (see Notes 1 and 2 below).

Breadth Requirement: Two graduate-level courses outside of the student’s research concentration (5000-level; including but not limited to the Department of Psychology). A third breadth course is taken as a Special Topics course (see Notes 1 and 2 below).

Note 1: All students must take two graduate-level advanced topic courses, one as a breadth course, and one as a depth course (either Psyc 6944 or Psyc 6954). We offer graduate seminars every semester that encourage our students to explore specialized topics in greater depth. These topics are driven primarily by student interest, and do not necessarily repeat unless student demand is high. Thus, these topics evolve as the research interests of our faculty and students evolve. Examples of topics in the past include: Frontal Lobe Development (Bell); Development of Infant
Attention (Panneton); Risk and Resilience in Development (Kim); Emotional Development (Dunsmore), Individual Differences (Deater-Deckard), Emotion, Stress, and Health (Friedman).

Note 2: departments that offer other courses that may be included in the plan of study to prepare for a research concentration include Biology, Chemistry, Human Development (including Gerontology), Human Nutrition, Foods, and Exercise, Industrial Systems Engineering (Human Factors), Philosophy, Sociology, Statistics, Women's Studies, Computer Science, and Veterinary Medicine. Also, although the DBP program does not offer a specialty in gerontology, students may additionally obtain a Graduate Certificate in Gerontology through the Center for Gerontology in the College of Human Resources and Education. This certificate is awarded only in conjunction with a masters or doctoral degree in a graduate program at Virginia Tech. It requires the student to take additional coursework in the field of aging and to participate in a practicum or field study. Furthermore, the thesis or dissertation must be on an issue in adult development and aging.

Additional Coursework Requirements

No additional coursework is required at this time.

iii. Industrial/Organizational Psychology (I/O):
http://www.psyc.vt.edu/graduate/io/curriculum

The I/O curriculum conforms to the Guidelines for Education and Training at the Doctoral Level in Industrial-Organizational Psychology and provides training in a number of areas including: Job analysis, Selection, Performance management, Training, Work motivation, Leadership, Organizational theory, and Organizational development.

Core Requirement (quantitative research methods): See “General Curriculum” section above.

Depth Requirement: In the I/O program, fulfillment of the Depth curriculum requirement is met within the completion of a set of courses described in “Additional Coursework Requirements” below.

Breadth Requirement: For I/O PhD students, this requirement is met by completing one course in three of the following four domains: Social Bases, Cognitive-Affective Bases, Developmental Bases, and Biological Bases. This requirement can be met by completing a foundation course (i.e., 5000-level) in an area, such as the Social psychology or Personality psychology course. However, other courses at the 5000- and 6000-level can be completed to meet a requirement in a domain. For example, a course in cognitive development can meet a requirement for a course in the developmental OR cognitive-affective area. Specific courses other than the foundation course to meet an area requirement should be decided by the student and her/his advisor.

Additional Coursework Requirements

Depth and additional coursework, beyond the department Core and Breadth requirements, include:

**MS course requirements:** All the following are required
- PSYC 5114: Industrial Psychology
- PSYC 5124: Organizational Psychology
- PSYC 5134: Advanced Psychometric Theory
- PSYC 6924: Advanced Topics in Industrial Psychology -- OR --
- PSYC 6934: Advanced Topics in Organizational Psychology

**PhD course requirements:** All the following (12 credits total) are required following the MS
PSYC 6014: Quantitative Topics in Applied Psychology
PSYC 6924: Advanced Topics in Industrial Psychology
PSYC 6934: Advanced Topics in Organizational Psychology

Electives: Two courses from this list are required prior to completing the PhD
EDRE 6634 (STAT 6634): Advanced Stats in Education
EDRE 6654 (STAT 6654): Multivariate Statistics
EDRE 6664 (STAT 6664): Structural Equation Modeling
EDRE 6794: Hierarchical Linear Modeling
EDRE 6794: Instrument Development
PHIL 6334 (STAT 6334): Philosophy of Statistics and Experimental Inferences

C. Waiving Core Courses and Transferring Depth, Breadth, and Additional Required Courses

Students who enter the PhD program after completing graduate level courses at another university may wish to request waivers of required courses. Requests for waivers should be made during the student's first semester of academic study, but may be considered later.

i. Waiving the Thesis Requirement

Students who have completed a Master’s thesis in another Department of Psychology and who wish to waive the thesis requirement at Virginia Tech should submit a letter requesting a waiver to their Area Directors along with a signed copy of their thesis. Normally, requests for waivers of the thesis requirement should be made during the student’s first semester in residence at Virginia Tech. Upon receipt of the student’s request for a waiver and thesis, the Area Director will convene a committee to read and evaluate the adequacy of the thesis. The committee should be composed of three faculty at Virginia Tech who hold the rank of Assistant Professor or higher and whose areas of expertise most closely match the topical and methodological area of the thesis. At least two of the committee members must be from the Department but they need not be from the student’s current Area. Area Directors may or may not be members of the committee. The standard for granting a waiver of the thesis requirement will be the completion of a thesis comparable in quality to that typically completed by students who receive their MS within the Department. Members of the evaluating committee will submit their vote regarding the waiver of the thesis requirement to the Area Director. It is not required that the evaluating committee meets to discuss the adequacy of the thesis although such a meeting may be scheduled at the request of any committee member or the Area Director.

If at least two committee members recommend waiver of the thesis requirement, the Area Director will send a letter to the Director of Graduate Programs documenting the membership of the evaluating committee and the final vote regarding the waiver of the thesis. The Director of Graduate Programs will then inform the student that the thesis requirement has been waived and will place a copy of this letter and the Area Director’s letter in the student’s file.

Note. A thesis submitted to an Area Director for waiver that was written in a foreign language must either be translated to English or the student must meet with the committee convened by the Area Director to explain the thesis. In either case, the student must present the thesis in English in sufficient detail for the committee to reach a decision regarding the quality and comparability of the document in relation to those completed in the Department. At least some of the thesis may need to be translated to aid in the evaluation process (e.g., the hypotheses, design, tables or results, etc.). The decision on whether to translate the thesis or meet with the committee to explain the document should be decided by the student in consultation with the committee members.

ii. Procedure for waiving a Core course
Comparability of the prior coursework to the Core courses in the Department is the primary criteria for granting a waiver. Students should first consult with the current instructor of the course they wish to waive and provide him or her with documentation of the completed course that will serve as basis for the waiver. Normally, this documentation would include copies of:

1. the transcript (unofficial is acceptable) showing a final grade of B or higher in the completed course;
2. the completed course syllabus, text, and reading lists;
3. tests, notes, projects, etc. from the completed course (if available).

This instructor then contacts the student by email or in writing. Although the instructor offers an informal opinion on the comparability of the completed course, the instructor does not make the decision on waiving a core course. If following the instructor’s review the student wishes to pursue the waiver, s/he then would submit all of this documentation along with the instructor’s email/letter to the Director of Graduate Programs. A separate request and set of documentation should be submitted for each requested Core course waiver.

The Director of Graduate Programs will submit the waiver request and documentation to be reviewed by an ad hoc committee of the Director and two faculty who regularly teach the department’s research methods course sequence. This ad hoc committee of three makes the final decision on the request for a waiver of a Core course. The Director will then notify the student of the Committee's decision and also place a letter of notification in the student's file in the Department office. The student also must be sure to document the waived Core course as a transferred course on her or his Plan of Study document.

ii. Procedure for transferring other courses (Depth, Breadth, and Additional courses)
Only Core courses require a waiver review by the instructor and department committee. All other courses that a student wishes to transfer and count toward her or his program-specific (Clinical, DBP, I/O) coursework requirements is handled within her or his program.

To request a transfer of a course, the student should submit a request by email or in writing to her or his advisor that includes the following documentation:

1. the transcript (unofficial is acceptable) showing a final grade of B or higher in the completed course;
2. the completed course syllabus, text, and reading lists;
3. tests, notes, projects, etc. from the completed course (if available).

The advisor then corresponds with the Area/Program Director regarding the nature of the student’s request, and the advisor’s recommendation regarding the transfer request. If needed, the Program Director can gather additional input from other faculty (e.g., faculty who teach similar or related courses) regarding the suitability or comparability of course content. The Program Director then makes the decision as to whether the course can be transferred and count toward the depth, breadth or additional coursework requirement within her or his program. The Program Director notifies the student of this decision by email or letter, and places a letter of notification in the student’s file in the Department office. The student also must be sure to document the transferred course on her or his Plan of Study document.

D. Exceptions to Department-Level Requirements
Requests for exceptions to these department-level requirements should be made in writing to the Director of Graduate Programs in Psychology who will then submit a recommendation to the Department Chair.

E. Foreign Language
The Student Advisory Committee may require that the student demonstrate proficiency in one foreign language. There is no departmental requirement on this matter. Any foreign language stipulation that a
Student Advisory Committee might make, however, must be made prior to the submission of the student's Plan of Study to the Graduate School.

**VII. Annual Evaluation of Graduate Students**

The progress that each graduate student makes toward the degree will be evaluated annually in the beginning of the Spring Semester. The evaluation will be conducted by the student's Area Faculty in consultation with the Student's Advisory Committee (SAC). The indication of the results of the evaluation will be placed in the student's folder and the student will be informed by the Area Director of the results of the evaluation.

**A. Evaluation and the Student Activity Report**

As part of the annual evaluation in the Spring semester, students complete the Student Activity Report (SAR). In order to complete the SAR process, a student must have an approved Plan of Study (POS). The SAR and POS instructions and document template can be found in the Graduate Handbook link at [http://www.psyc.vt.edu/graduate/](http://www.psyc.vt.edu/graduate/)

The following factors will be considered in the evaluation:

A. **QCA**. All graduate students are expected to maintain an overall QCA of at least 3.0. For annual evaluations, the overall grade point average of first-year students will consist of at least the Fall semester. For second-year (and above) students, the evaluation will consist of at least two consecutive semesters.

B. **Research Participation**. The graduate student is expected to become involved in a research project under the guidance of a faculty member and begin doing research by the Spring Semester of the first year. Factors that are to be considered in this component of the evaluation include research attitude and motivation, comprehension and understanding of research activity, and research execution and productivity.

C. **Professional Activity and Acceptance of Professional Responsibilities**. One component under this category reflects the student's activity outside the classroom and is distinct from the formal laboratory setting. Representative activities include attendance at department-sponsored colloquia and symposia, participation at national, regional, or local meetings when possible, and generally availing oneself of appropriate resources that the department and the profession provide for continued development. A second component under this category includes the demonstration of professional behavior consistent with established standards of scientific and ethical conduct both in the laboratory and in practicum settings.

D. **Practicum Evaluation (Clinical PhD students only)**: Satisfactory progress in clinical practicum also will be part of the annual evaluation for Clinical PhD students.

**B. Probation, Lack of Progress, and Termination**

Failure to make satisfactory progress in these designated areas will lead to an evaluation of probationary status or termination from the department. A student whose overall QCA is below 3.0 will be placed on academic probation. If the student is unable to improve the overall QCA to 3.0 or above after the next semester, the student may be terminated from the graduate program. Recommendations for terminating a student from graduate studies in Psychology due to "unsatisfactory progress toward the degree" may come from the student's Area Faculty, the Student Advisory Committee, or from the Doctoral Admissions Committee. Such recommendations should be made directly to the Director of Graduate Programs, who will consult the student's Area Faculty, the Student Advisory Committee, and other appropriate sources before
making a recommendation to the Department Chair. The Department Chair will then make a
recommendation to the Dean of the Graduate School.

C. Graduate Student Appeals

A graduate student who believes that any work has been improperly evaluated, or believes that there has been
unfair treatment, is expected to follow Department and University policies and procedures for appeal. These
are described in this document in a subsequent section on student grievances, and in the University’s
Graduate Catalog.

VIII. Path to the Masters and PhD

A. Role of MS Degree en Route to the PhD

Students are admitted to the Doctor of Philosophy degree program in the Department. However, the
Department views the successful completion of a Master's thesis and associated courses as an important
component en route to the doctorate. Accordingly, it does not offer a non-thesis MS degree. Moreover, all
graduate students must demonstrate successful completion of the MS degree and be reviewed by their Area
faculty and Department-level faculty (Director of Graduate Programs, and Department Chair) prior to
beginning the preliminary examination process. For students who obtain their MS within the Department, this
review and evaluation is accomplished by requesting permission to continue in the PhD program and to
initiate the preliminary examination (described below).

Graduate students who enter the Department with an MS from another Department of Psychology are
required to demonstrate successful completion of all requirements for the MS in psychology at Virginia Tech
prior to receiving the Ph.D. Although they may complete these requirements anytime prior to receiving the
Ph.D., they must have the thesis requirement waived (described above) and be evaluated for readiness by
their Area faculty prior to entering the preliminary exam process.

B. Required Steps toward the MS Degree

The University’s Graduate Catalog offers a detailed explanation of University-level requirements. The
following text delineates only Psychology Department additions and changes from the Graduate Catalog.

How to File the MS Plan of Study (see Core and Breadth Curriculum above): instructions, examples, and
document templates can be found in the Graduate Handbook link at http://www.psyc.vt.edu/graduate/

Prior to completing 15 credit hours, you are required to file a Plan of Study for the Master's Degree. Please
consult your major advisor and Area Director before composing a Plan of Study. They will explain the
required components and format for the Plan of Study. After composing the Plan, obtain the signatures of all
members of your MS Student Advisory Committee, the Area Director, the Director of Graduate Programs in
Psychology, and the Department Chair. You must include the faculty identification number of any committee
member who is not a regular Psychology Department faculty member below her/his name on your program
of study. If your Plan of Study changes prior to completion of the MS you must complete a change of plan
form that is signed by your advisory committee members, the Director of Graduate Programs, and the
Department Chair. Failure to have an accurate Plan of Study entered on the University computer system will
preempt graduation.

How to Schedule the Final Examination for Defense of the Master's Thesis:

1. You must schedule the defense of your Master's thesis with the Graduate School. This request should
   be made at least two weeks prior to the date of the examination. The Graduate School will issue the
examination card to your major advisor on the date of the examination. STUDENTS WILL NOT BE ALLOWED TO TAKE THE EXAM WITHOUT THE EXAMINATION CARD. The major advisor returns the signed examination card to the Graduate School following the exam.

PLEASE READ THE GRADUATE CATALOG REGARDING "PROCEDURES FOR GRADUATION"

C. Applying for Continuation on to the PhD and Initiating the Preliminary Examination

As described above, after completion of the MS, continuation in the PhD program and initiation of the Preliminary Examination requires that the student be evaluated by their Area faculty, the Director of Graduate Programs, and Department Chair. This process is invoked by the student.

1. Student provides application packet to Area Director that contains:
   - A letter to Area Director asking for continuation in the doctoral program. The letter should include a statement regarding future educational and research objectives, professional goals, and the name of the faculty member who will supervise your PhD work;
   - A copy of the final MS thesis;
   - A copy of your most recent annual evaluation (SAR) and, for Clinical PhD students, the past year’s practicum evaluations
   - A current curriculum vita (CV)

2. Student requests that your MS thesis committee members send letters directly to the Area Director regarding their recommendations on your continuation in the doctoral program.

3. The Area Director will convene the Area faculty, who will evaluate the application and vote on continuation in the doctoral program. The Area Director will forward the application packet, the outcome of the vote, and a summary of any reasons for dissenting opinions, to the Director of Graduate Programs in Psychology.

4. The Director of Graduate Programs will review the student’s application and academic record for any of the following indicators of potentially deficient performance:
   - A dissenting vote on continuation from one or more of the Area faculty;
   - Unsatisfactory progress in one or more areas on the most recent annual evaluation;
   - Overall cumulative GPA less than 3.2.

5. If there are no indicators of deficient performance, the Director of Graduate Programs will give the application to the Department Chair for a final decision on continuation. If one or more indicators of deficient performance are present the Director of Graduate Programs will convene the Doctoral Admissions Committee (which includes the director of graduate programs, the three area/program directors and a faculty representative of the student which may or may not be the advisor), who will review the application and vote on continuation. The Director of Graduate Programs will transmit the results of the vote to the Department Chair along with the application and summary of the Area vote.

6. The Department Chair will make the final decision regarding her or his request for continuation and notify the student, the Director of Graduate Programs, and the Area Director.

D. Required Steps toward the PhD Degree

The University’s Graduate Catalog offers a detailed explanation of University-level requirements. The following text delineates only Psychology Department additions and changes from the Graduate Catalog.
Prior to completing 15 hours beyond the MS degree, the PhD candidate must file a Plan of Study for the PhD. You will need signatures from the members of your PhD Student Advisory Committee, your Area Director, the Director of Graduate Programs, and the Department Chair. For students who have obtained core course waivers, please attach a copy of Director of Graduate Program’s notification letter. Your plan of study should note the semester and year that you plan to take your preliminary examination. Also, you must include the faculty identification number of any committee member who is not a regular Psychology Department faculty member below his/her name on your plan of study. If your Plan of Study changes prior to completion of the PhD you must complete a plan of study change form and have it signed by advisory committee members, the Director of Graduate Programs, and the Department Chair. Failure to have an accurate Plan of Study entered on the University computer system will preempt graduation.

The Preliminary Examination:

All PhD candidates must take a Preliminary Examination. This examination requires that the student demonstrate competency in doctoral level material. The examination involves both written and oral components. The content and process of the exam varies by Area within the Department but the following requirements are consistent across Areas:

1. Before taking the Preliminary Examination, students must formally have approval to continue in the PhD program by the beginning of the semester in which they intend to take the Preliminary Examination.

2. A PhD candidate must file a Plan of Study for the PhD before taking the preliminary examination.

3. The Preliminary Examination in the Department of Psychology is given by the PhD Student Advisory Committee in some graduate areas and by the entire Area Faculty in other Areas.

How to Enter the Preliminary Examination:

1. After consulting with the Student Advisory Committee about the appropriate date, the student must submit a request for scheduling the actual date of the oral preliminary examination to the Graduate School. This request must be made at least two weeks prior to the date of the examination.

2. An examination card will be issued by the Graduate School on the day of the examination to the major advisor. STUDENTS WILL NOT BE ALLOWED TO TAKE THE EXAM WITHOUT THE EXAMINATION CARD. The card must be signed by at least five (4) members of the Faculty who administered the examination and then returned to the Graduate School by the major advisor. The Area Director will notify the Director of Graduate Programs in Psychology of the outcome of the student's attempt at the examination.

The Final Examination (Dissertation):

All PhD students must take a final written and/or oral examination in defense of their dissertation. This examination is given by the PhD Student Advisory Committee. The following steps should be taken:

1. The student must submit a request to schedule the final examination to the Graduate School. This request must be made at least two weeks prior to the date of the examination.
2. An examination card will be issued by the Graduate School on the date of the examination to the major advisor. **STUDENTS WILL NOT BE ALLOWED TO TAKE THE EXAM IF THEY DO NOT PRESENT THE EXAMINATION CARD.** The card must be signed by the members of the PhD advisory committee who administer the examination. It must then be returned to the Graduate School on that day.

*PLEASE READ THE GRADUATE CATALOG REGARDING "PROCEDURES FOR GRADUATION."*

**IX. Grievance Procedures**

Whenever a Psychology department graduate student believes that any work has been improperly evaluated, or believes that there has been unfair treatment, it is expected that the student will take up the questions directly with the faculty member involved. This may be the committee chairman, another faculty member, or an instructor responsible for a course. If, after earnest inquiry, the matter is not reconciled, the graduate student will be expected to appeal the question to her or his Area/Program Director. If the director is a party to the grievance, then the student should appeal the question to the Director of Graduate Programs, who will assume this responsibility. The Area Director or Director of Graduate Programs will choose two other faculty members to review the grievance and make a recommendation to the Department Chair who will make a decision on the matter (or to the College’s Academic Dean, if the Department Chair is party to the grievance). A response in writing to the student from the Department Chair will be provided within one month of the student’s appeal. A student can appeal the Department decision by entering the University Appeals Procedure, described in the Graduate Catalog.

**X. Unauthorized Use of Departmental Resources**

Duplicating facilities, long distance telephone lines, internet access, supplies, and other resources are to be used only for official departmental business (e.g., when required as part of your GA/GTA/GRRA assignment), and then only when specifically authorized by the Department Chair or your immediate faculty supervisor. Under no circumstances should departmentally issued door keys be duplicated or assigned to others.

Students may only use computer facilities for matters pertaining to the academic requirements of their graduate program. Any use of the computer for personal matters is considered a theft of government property and is punishable by law.

**XI. Student Classifications and Assistantships**

**Students’ Classifications** are defined as follows based on their status at the start of the Fall Semester:

1. First Step: Students who have not completed the MS in Psychology and who have taken fewer than 24 hours at the graduate level.

2. Second Step: Students who have not completed the MS in Psychology and who have completed 24 or more hours at the graduate level.

3. Third Step: Students who have completed the MS in Psychology but who have not passed the preliminary examination.

4. Fourth Step: Students who have passed the preliminary examination. This step is given only once. After having occupied this step for one year, the student will be returned to the Third Step.
Changes in Steps can only occur prior to the beginning of the Fall Semester. Graduate funding is associated with an instructional fee scholarship. A 20-hour GA/GTA/GRA is associated with a 100% instructional fee scholarship; graduate funding at other levels of hours is associated with a pro-rated instructional fee scholarship. For example, a 10-hour position includes a 50% instructional fee scholarship; a 15-hour position includes a 75% instructional fee scholarship. Graduate funding levels are based on steps (8-11) and levels (A, B, and C). All students who accept graduate funding from the Department of Psychology are required to attend the GTA Training Workshop during the first year of funding. The GTA Training Workshop is conducted by the Graduate School during the week before fall semester classes begin.
